CONTENTS

Articles

- 131 ASER of SISO system with rectangular QAM scheme over α - μ fading channels
Rajkishur Mudoj
- 144 Speed sensorless control of seven phase asynchronous motor drive system using extended Kalman filter
Elbarbary Z.M. Salem
- 161 Investigations of microwave integrated detector and its processing circuit
Sen Zhang and Xiaoping Liao
- 169 Increase the bandwidth of the power amplifier to 185% of the bandwidth by ferrite transformers
Mais Muhamed, Fariz Abboud and Mohamed Alhariri
- 177 High-temperature LTCC assembly and design of SiC BJT-based negative charge pump
Sajib Roy, Khandokar Asif Faruque, Affan Abbasi and Alan Mantooth
- 188 Design and analysis of high performance and low power FFT for DSP datapath using Vedic Multipliers
Nidhi Gaur, Pradeep Kumar and Anu Mehra
- 200 Design of odd-even multiplexer for all-edges-triggered flip-flops
Yan-Feng Lang
- 209 A millimetre-wave GaAs monolithic multifunctional quadrupler chip with high harmonic rejection and high output power flatness
Ce-Tian Wang, Hai-Feng Wu, Wei Tong, Yu-Nan Hua, Yi-Jun Chen, Liu-Lin Hu, Ji-Ping Lv and Qian Lin
- 219 Detection performance of airborne FDA-MIMO radar under non-IID RCS scenario
Yisheng Yan, Wen-Qin Wang, Ronghua Gui and Jingye Cai
- 231 A Quasi-Moment-Method empirical modelling for pathloss prediction
Sulaiman Adekola, Ayotunde Ayorinde, Francis Okewole and Ike Mowete
- 245 Outage Analysis of Multi-Source Energy Harvesting in a NOMA assisted Network.
Aradhana Misra and Kandarpa Kumar Sarma
