

# Faculty of Engineering

جامعة عمان الأهلية  
الاهلية

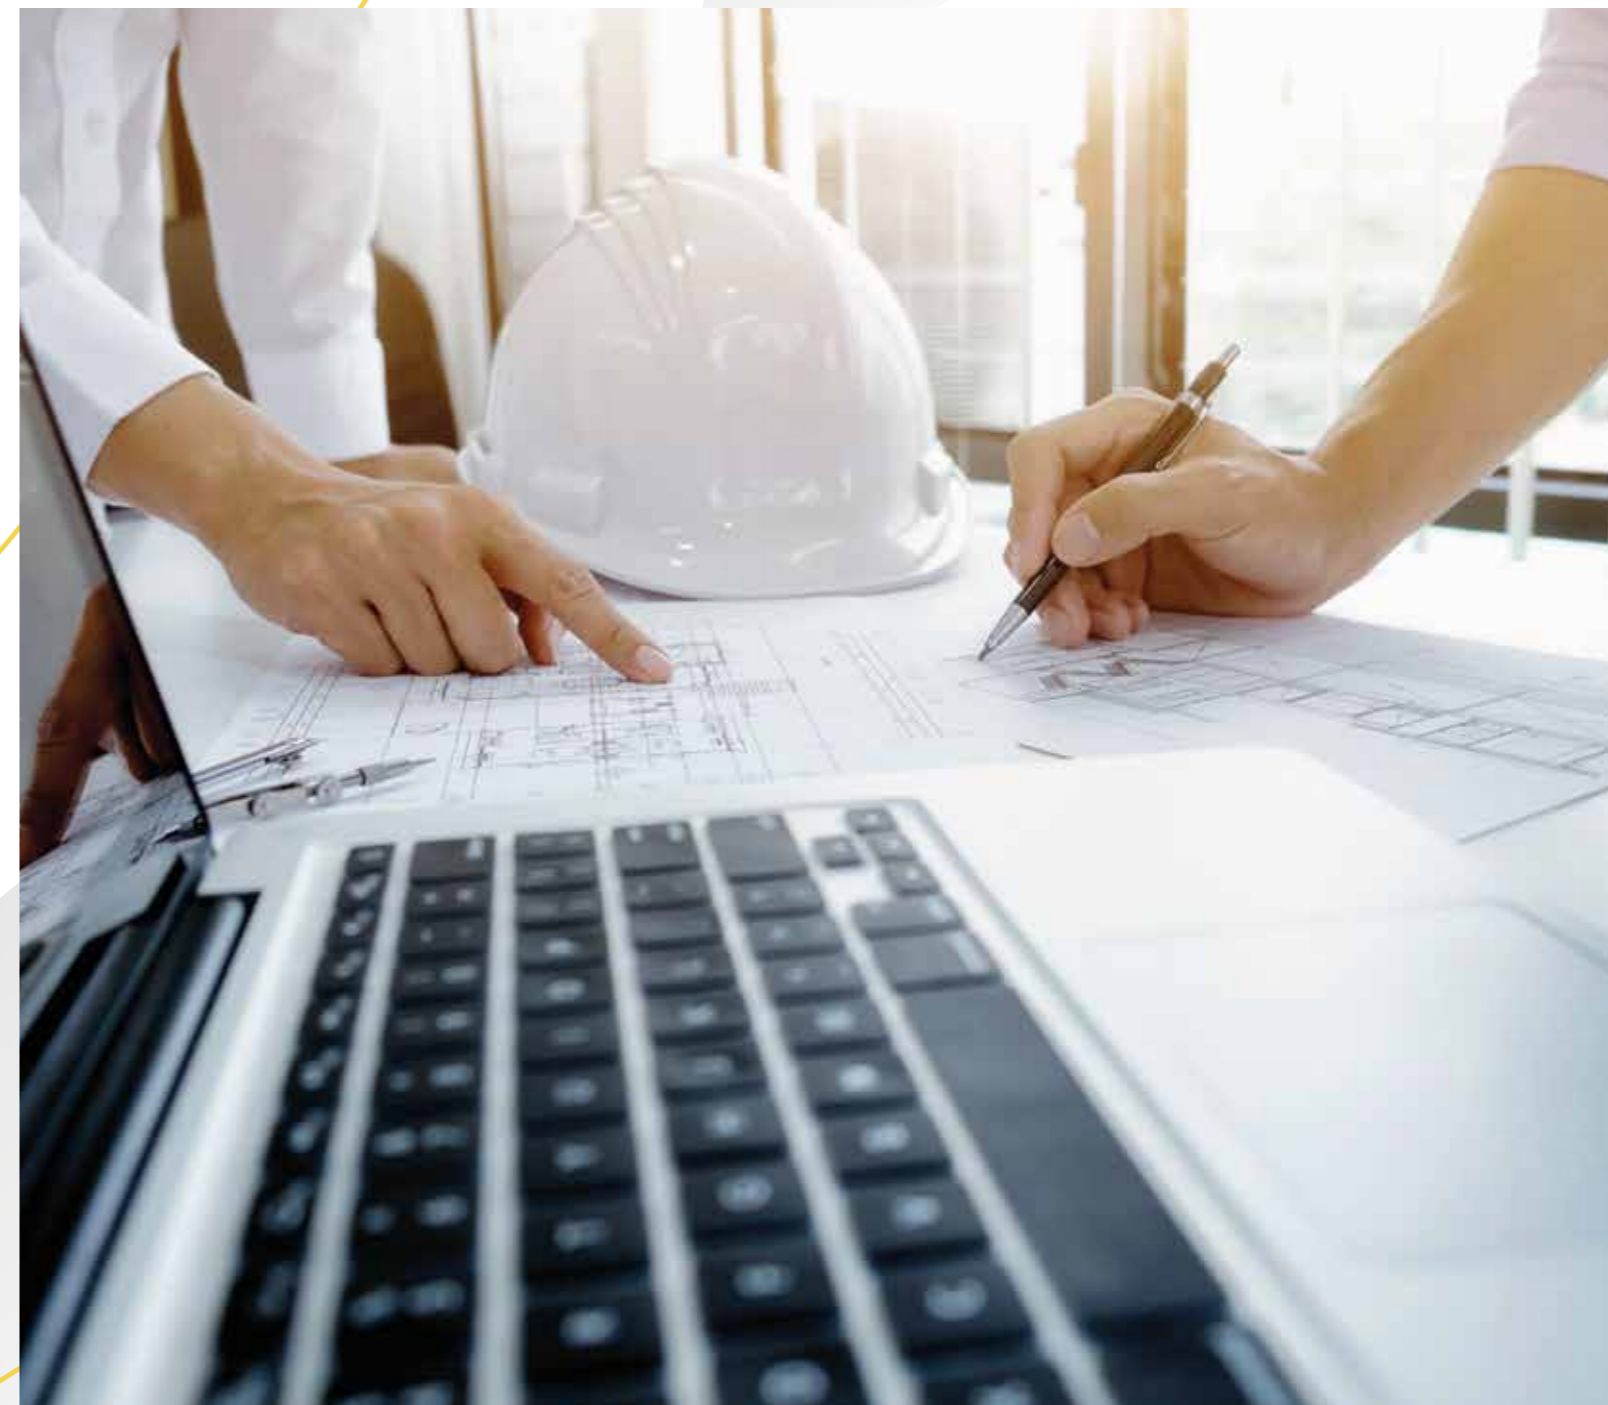

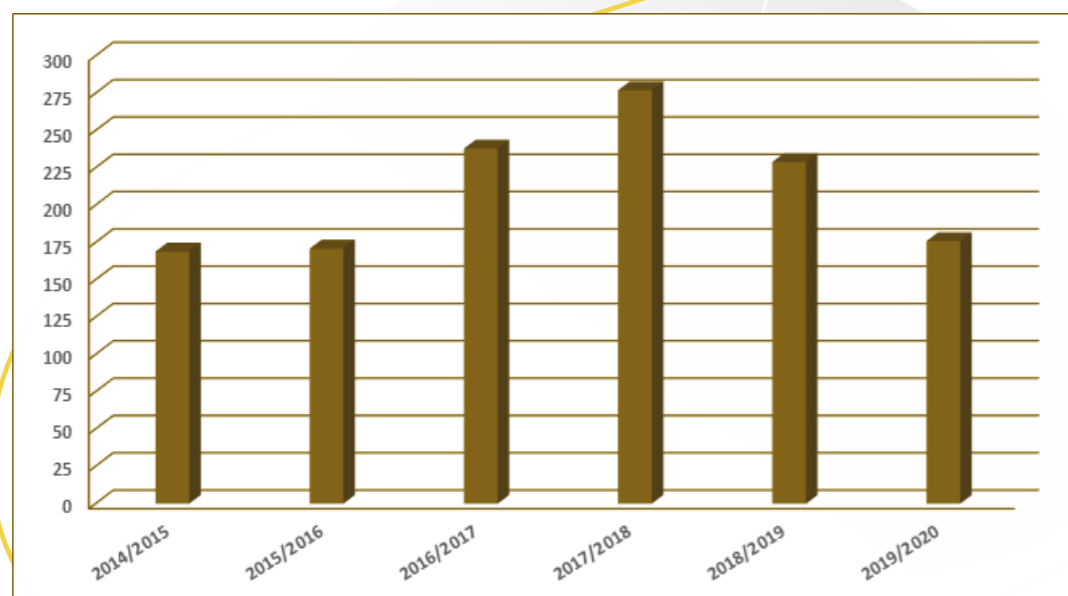

## Labs and Equipments

The Faculty of Engineering labs are equipped with high quality equipment and instruments that are required for teaching and scientific research. The Faculty administration periodically modernize the equipment to be in line with the rapid technological development.

## Alumni

Since its establishment; more than 3000 Engineers of Arab nationalities including Jordanians, graduated from the Faculty of Engineering. A number of graduates pursued their post-graduate studies and received a doctorate degree from different universities abroad. Few faculty graduates are working as faculty members and some of them hold senior administrative positions.

A Visual presentation of faculty graduates during the last six years is shown below

## About Us

The Faculty of Engineering at Al-Ahliyya Amman University was established to meet the growing demand for graduates in Engineering fields in all disciplines.

The faculty provides the local and regional labor market with high caliber, qualified and well-trained graduates that serve in public and private institutions. The faculty aims to contribute to the development of the national economy and the welfare of the community. The Faculty of Engineering established in 1991. Since then, the Faculty has expanded to include the following five academic departments that grant Bachelor Degrees:

- Electronics and Communications Engineering.
- Computer Engineering.
- Medical Engineering.
- Civil Engineering .
- Electrical Engineering.

The Faculty offers two master degree programs:

- MSc. in communications Engineering
- MSc. in Intelligent Transportation Systems (ITS)

## Vision

The Faculty of Engineering in Al-Ahliyya Amman University will be the first choice for students interested in one of the Engineering specializations offered at the local and regional levels by the University.

## Mission

Our mission is to prepare qualified Engineers capable of coping with the latest technical and scientific developments and to encourage scientific research which contributes to the progress, development and integration of various Engineering Sciences. We also aim to achieve international accreditation for the specializations offered at the University.

## Core Values

- Quality and proficiency.
- Creativity and excellence.
- Integrity and transparency.
- Teamwork.
- Cultural diversity.

The Faculty of Engineering thrives to provide distinguished academic education by recruiting exceptional Faculty members with long academic, as well as industrial experiences. In addition, the Faculty emphasizes on implementing a carefully designed plan that delivers study programs at highest standards.

The Faculty always look for new Engineering programs that fulfill and meet the ever-changing demands and requirement of the labor market.
